WOMEN WHO CODE ®

+

vevo

Thank you Vevo, for hosting us!

Wifi:VevoGuest

pw: on the whiteboard

You are

- Incredibly comfortable with change
- Comfortable driving cultural changes
- Good working with other teams

You know

- Linux Fundamentals + Scripting
- Tools/Tech knowledge base
- CI/CD experience
- IAC (Infrastructure as Code)
- DevOps Key Concepts
- Soft Skills

Your most overlooked skill

- How to say "I don't know"

Example questions

- How do DevOps & Agile differ?
- What is the need for DevOps?
- Which are the top DevOps tools? Which tools have you worked on?
  - Git : Version Control System tool
  - Jenkins : Continuous Integration tool
  - Selenium : Continuous Testing tool
  - Puppet, Chef, Ansible : Configuration Management and Deployment tools
  - Nagios : Continuous Monitoring tool
  - Docker : Containerization tool
- How do all these tools work together?

Example questions

- Why DevOps? What do we get?
    - Continuous software delivery
    - Less complex problems to fix
    - Faster resolution of problems
    - Faster feature delivery
    - More stable operational environments
    - More time for value add (less on maintain)
    - Work smarter not more

Example questions

- Explain from your own experience how DevOps can be used in industry/ real-life.
  - If you don't have this example, don't worry, say so.
  - Explain how you would think about solving problems this way.
  - Remember, they want to see how you interact and think.
- Are there any anti-patterns with DevOps?
  - Agile == Devops
  - DevOps is a separate group
  - DevOps will solve all problems
  - DevOps means devs managing prod
  - Development driven
  - IT driven
  - Can't be done

Social stuff

- LinkedIn stalk the company
  - Interviewers
  - Teammates
  - CEO + execs
    - Do this even if you don't know or expect to ever talk to them.
      Some notice, and you get a +1
    - You also might run into them in the hall - you never know what will give you an edge in a human situation, knowing their background might
- Review the company site, marketing
- Review benefits packages
- Review Glassdoor reviews
  - Prep questions with any red flags so you know what you're in for

Day of Prep

- Breathe, Hydrate
    - plan to be talking all interview/day
      (until the Vulcans can just mind-meld our skillset)
- Onsite: Plan your route out at least the day before
